Real Estate Economics, online text

Course Description

Real estate value is affected by the interplay of constantly changing social, economic, governmental, and physical forces, which often occur in a cyclical pattern. For an appraiser to complete a credible appraisal, he or she must be able to understand the direction and pattern of these changes as well as their probable impact on value. To keep abreast of the relative strength of the marketplace in which real property trades, appraisers monitor trends and gather data on the changes in those markets. This course examines real estate markets and the economic indicators and policies that influence property value.

This course provides continuing education hours for the licensed real estate appraiser. It is intended to enhance the knowledge and effectiveness of appraisers in all license categories and is approved by the Bureau of Real Estate Appraisers for 4 hours of continuing education.

Learning Objectives

After completing this course, you will be able to:

2. Differentiate the various types of markets and identify the participants in them.
4. Recognize the characteristics of demand and supply.
5. Differentiate among the types and sources of economic indicators.
9. Indicate how fiscal and monetary policies affect the economy.

Course Time Frame

Students must spend a minimum of 4 classroom hours* in this course. Access to specific assignments will be restricted to ensure that students accumulate the required seat time.

*A classroom hour is defined as 50 minutes for each clock hour the course is approved.

Grading/Evaluation Policy

Performance is measured by online lesson quizzes and unit exams. To complete this course successfully, students must complete: 4 Units including all reading assignments, Lesson Quizzes, and Unit Exams. A minimum passing score of 70% or better is required on all quizzes and exams. Quizzes and exams with scores below 70% must be retaken until the score meets or exceeds 70%.
